# GLOBAL VIRTUAL INDUSTRY

- The global augmented reality (AR), virtual reality(VR), and mixed reality (MR) market is forecast to reach 30.7 billion U.S. dollars in2021, rising to close to 300 billion U.S. dollars by 2024.
- The Virtual Reality (VR) market is estimated to grow at a CAGR of about 48.7% over the forecast period 2021 to 202. With many individuals compelled to work remotely because of the COVID-19 pandemic, the very idea of how organizations work together is evolving quickly. This is anticipated to augment the market for virtual reality.
- As of now, employees are collaborating utilizing video-conferencing platforms, for instance, Zoom, and talking on Slack, Teams, and other texting applications. However, there's another, the conceivably undiscovered path for individuals to work together regardless of whether they're handfuls or even several miles apart: virtual reality (VR).
- VR Technology has gained widespread recognition and adoption over the past few years. Recent technological advancements in this field have revealed new enterprises. Numerous players are emerging in this market with the hopes of navigating it toward mainstream adoption.
- Virtual reality has often found its application compelling, with interactive video games or even movies and television series. Wherever it is too dangerous, expensive, or impractical to do in reality, virtual reality is seen as an ideal replacement. With the increasing demand for cloud gaming and innovative gaming consoles, the demand for immersed environment gaming is increasing rapidly.
- One of the most well-known uses of VR headsets is in gaming applications. Companies such as Oculus, HTC, and Sony, have created a range of products that consumers can use for a total immersive gamine experience. However, there are also other applications for XR products, such as remote assistance and training.

- The investments by the technology vendors are creating advancements in the field of display technology, which is going to change the vision of the traditional methodology. With technology giants like Google investing considerable amounts in tech startups to develop VR devices and other prominent players investing in their R & D over this segment, the market's future will be more competitive.
- Consumers are widely using VR applications based on different purposes, such as the automobile, gaming, and media and entertainment industries. The latest technologies across the consumer electronics segment are boosting the growth of virtual reality for multiple applications across the marketplace. For instance, consumers are moving toward virtual reality in gaming with high definition, stunning graphics, and motion with high-end audio.

# PALM NFT

PALM NFT is a vital part of our ecosystem dealing with NFT'S. \$PALM Non-fungible tokens (NFTs) are unique, non-interchangeable assets, minted on-chain. These tokens can be linked to anything from digital PALM. The core attributes of PALM RIDER NFTs give them unique value and categorically separate them from other types of assets. These properties include being verifiably unique and indivisible. The transparent nature of the underlying code means that the scarcity and ownership of any given token are evident without the need for a trusted intermediary.

We view the emergence of NFTs as a continuation of a paradigm shift from centralized to decentralized systems. This framework is now unlocking fresh business models for the creators of digital and physical collectibles. PALM RIDER is a widely known NFT project. The underlying token for each PALM encodes a unique genome that defines its appearance, traits, and hereditary lineage. PALM RIDER cannot be replicated and cannot be transferred without the user's permission.
